Introduction

The EDS-309 series includes 9-port Ethernet switches with three Fiber ports that provide an economical solution for your industrial Ethernet connection, and the built-in relay warning function alerts maintainers when power failures or port breaks occur. The EDS-309 Series includes 2 models: one with an operating temperature range of 0 to

60°C, and the other one with extended operating temperature range of -40 to 75°C. These 2 models are designed for standard and extended operating temperatures respectively, and go through a 100% burn-in test to ensure that they fulfill the special needs of industrial automation control.
